Contents

Preface vii

Committees viii

ICL'96 Prize x

Contents xi

Section 1. Luminescence and modern trends in solid state lasers

Up-conversion processes in laser crystals
G. Huber, E. Heumann, T. Sandrock, K. Petermann 1

Green-red photoluminescence from colored LiF films for integrated active devices
R.M. Montereali 4

Lasers based on sol–gel technology
R. Reisfeld 7

New trends in tunable lasers based on color center and radiationally pertubed doped crystals
S.B. Mirov 9

Section 2. Near field microscopy and single molecule spectroscopy

Far- and near-field optical spectroscopy of cleaved edge quantum wires
M. Katz, D. Gershoni, T.D. Harris, L.N. Pfeiffer 12

Fluorophores for single molecule microscopy
G.J. Schütz, H.J. Gruber, H. Schindler, Th. Schmidt 18

Single- molecules spectral lines 'erasing' under powerful infrared illumination
T. Plakhotnik, D. Walser, A. Renn, U.P. Wild 22

Section 3. Quantum coherence

Interband coherence in semiconductors; excitons and beyond
J.M. Hvam, D. Birkedal, V. Mizeikis, K.E. Sayed 25

Section 4. Advanced nanostructural materials

Semiconductor microcavities for spontaneous emission control
I. Abram 29

Luminescence properties of semiconductor quantum dots
D. Bimberg, N.N. Ledentsov, M. Grundmann, R. Heitz, J. Böhrer, V.M. Ustinov, P.S. Kop'ev, Zh.I. Alferov 34

Hierarchical structure of one-dimensional J-aggregates
T. Kobayashi, K. Misawa 38

Luminescence and laser spectroscopy of highly porous γ-Al_2O_3 doped width 3d-and 4f-ions: Effects of spatial phonon confinement
S.P. Feofilov, A.A. Kaplyanskii, R.I. Zakharchenya 41

Section 5. Applications: electroluminescent displays, phosphors

Ultraviolet luminescence and electro-luminescence of polydihexylsilane
K. Ebihara, S. Matsushita, S. Koshihara, F. Minami, T. Miyazawa, K. Obata, M. Kira 43

The role of impurity in doped nanocrystals
R.N. Bhargava 46

Recent achievements in research on phosphors for lamps and displays
C.R. Ronda 49

Section 6. Blue light emitting systems

InGaN quantum-well structure blue LEDs and LDs
S. Nakamura 55

Photoluminescence and optical gain in highly excited GaN
L. Eckey, J. Holst, A. Hoffmann, I. Broser, H. Amano, I. Akasaki, T. Detchprohm, K. Hiramatsu 59

Red to blue up-conversion in $Y_2SiO_5:Tm^{3+}$
E. Bielejec, E. Kisel, A.J. Silversmith 62

The photon avalanche as a bifurcation phenomenon: Application to various Tm^{3+}-doped materials
S. Guy, M.F. Joubert, B. Jacquier 65

Violet–blue emissions due to frequency up-conversion in Nd^{3+}-doped fluoroindate glasses
L.H. Acioli, C.B. de Araújo, J.-T. Guo, Y. Messaddeq, M.A. Aegerter 68

Section 7. Organized molecular systems

Non-equilibrium excitation energy transfer in sequentially stacking molecular systems
I. Yamazaki, M. Yamaguchi, N. Okada, S. Akimoto, T. Tamazaki, N. Ohta 71

Ultrafast photo-induced charge separation and its structural control in polyene and thiophene supermolecules
H. Port, A. Hartschuh, T. Hirsch, H.C. Wolf 75

Photo-induced proton transfer in crystalline 2-(2′,4′-dinitro-benzyl)pyridine
R. Casalegno, A. Corval, K. Kuldová, O. Ziane, H.P. Trommsdorff 78

Luminescent properties and photogeneration of charge carriers in porphyrin dimers and molecular photo-diodes
T.J. Schaafsma, T.J. Savenije, R.B.M. Koehorst, F.J. Vergeldt, J. Wienke 81

Section 8. Bulk semiconductors

High-resolution study of the anisotropy of the magnetic field effect on the $^4E(G)$-level of Mn^{2+} in ZnS
B. Litzenburger, U.W. Pohl, H.-E. Gumlich, R. Parrot, D. Boulanger 83

Magnetic field effects on luminescence and excitation spectra in β-ZnP_2
M. Sugisaki, O. Arimoto, K. Nakamura 85

Phase matched second harmonic generation using a $\chi^{(2)}$ modulated ZnTe/ZnSe optical waveguide
H.P. Wagner, M. Kühnelt, G. Wein, W. Gebhardt, D. Eisert, G. Bacher, A. Forchel 87

Photoluminescence analysis of laser-deposited CdS films
G. Perna, M. Ambrico, D. Smaldone, R. Martino, V. Capozzi 90

Excitation mechanisms of CsI fast intrinsic luminescence
A.N. Belsky, R. Cortes, A.V. Gektin, P. Martin, V.V. Mikhailin, C. Pédrini 93

VUV excitation of intrinsic luminescence of ionic crystals with complicated band structure: Simulation
A.N. Belsky, R.A. Glukhov, P. Martin, V.V. Mikhailin, C. Pédrini, A.N. Vasil'ev 96

Enhanced photoluminescence from InP deposited and treated by remote plasma processes
V. Capozzi, T. Trovato, G.F. Lorusso, G. Perna, M. Losurdo, P. Capezzuto, G. Bruno 98

On the nature of the anti-Stokes liminescence in chromium-doped ZnSe crystals
V.Yu. Ivanov, Yu.G. Semenov, M. Surma, M. Godlewski 101

Photoluminescence from deep acceptor–deep donor complexes in CdTe
J. Krustok, H. Collan, K. Hjelt, J. Mädasson, V. Valdna 103

Ultrafast energy transfer in manganese-doped ZnSe
T. Kuroda, H. Ito, F. Minami, H. Akinaga 106

Femtosecond time-resolved photoelectron spectroscopy of annealed and sputtered GaP(1 1 0)
M. Leblans, R.K.R. Thoma, J.L. LoPresti, M. Reichling, R.T. Williams 108

Stress study of 1.5 μm emission in Si:Er and GaAs:Er
J.P. Leitão, M.C. Carmo, M.O. Henry 110

Field-induced ionization of excited luminescent centers at high electric field strength
Z. Lou, Z. Xu, F. Teng, X. Xu 112

Temperature dependence of cross-luminescence bandwidth
V.N. Makhov, M.A. Terekhin, I.H. Munro, C. Mythen, D.A. Shaw 114

Cr^{2+} emission spectroscopy in CdSe
K.L. Schepler, St. Kück, L. Shiozawa 116

Photoluminesence properties of doped- and undoped-$CuGaSe_2$ single crystals
J.H. Schön, H. Riazi-Nejad, Ch. Kloc, F.P. Baumgartner, E. Bucher 118

Correlation between electrical and photoluminescent properties of CdTe purified by extraction
P.N. Tkachuk, V.I. Tkachuk, N. Korbutjak 121

Excitation and thermal quenching properties in nitrogen codoped Si:Er
S. Uekusa, K. Shimadzu, K. Awahara, K. Yabuta 123

Strong emission from Er-doped porous GaP at room temperature
S. Uekusa, Y. Yano 126

Section 9. Rare-earth and transition-metal ions in insulators

Classical phosphors: A Pandora's box
G. Blasse 129

Visible and infrared luminescence properties of Er^{3+}-doped Sc_2O_3:$LiNbO_3$ crystal fibers
R. Burlot, R. Moncorgé, G. Boulon 135

High-pressure luminescense studies of Cr^{4+}-doped laser materials
U. Hömmerich, Y. Shen, K. Bray 139

Optical transition mechanisms of Sm^{2+} and Eu^{3+} in solids
M. Tanaka, T. Kushida 141

First principles investigation of host excitation of $LaPO_4$, La_2O_3 and $AlPO_4$
K.C. Mishra, I. Osterloh, H. Anton, B. Hannebauer, P.C. Schmidt, K.H. Johnson 144

Emission properties of Nd^{3+} in several fluoride crystals
A.N. Belsky, P. Chevallier, J.Y. Gesland, N.Yu. Kirikova, J.C. Krupa, V.N. Makhov, P. Martin, P.A. Orekhanov, M. Queffelec 146

Energy levels of Cr^{4+} in YAG
M.G. Brik, V.V. Zhorin 149

Determination of the quantum efficiency of Er^{3+} in glasses: indirect and direct methods
F. Auzel, D. Meichenin, A. Mendorioz, R. Balda, J. Fernandez 152

Silicate crystals for infra-red lasers
A.G. Avanesov, V.A. Lebedev, V.V. Zhorin, A.G. Okhrimchuk, A.V. Shestakov 155

Especialities of Ti^{3+} excitation in $YAlO_3$ crystals
V.I. Baryshnikov, J. Kvapil, N. Sarukura, Y. Segawa 157

Synthesis, crystal structure determination and theoretical prediction of the structure and electronic spectrum of $Eu(btfa)_3bipy$
H.J. Batista, A.V.M. de Andrade, R.L. Longo, A.M. Simas, G.F. de Sá, L.C. Thompson 159

Electric-field-induced broadening of persistent spectral holes in Sm^{2+}-doped borate glass
A. Birner, R. Bauer, U. Bogner 162

Luminescence of CrO_4^{3-} and MnO_4^{2-} in various hosts
T.C. Brunold, M.F. Hazenkamp, H.U. Güdel 164

Theoretical estimations of vibronic transition rates for Pr^{+3} in different host lattices
A.F. Campos, C. de Mello-Donegá, O.L. Malta 166

Up-conversion luminescence of Er^{3+}-doped yttrium-scandium-gallium garnet at different temperatures
X. Chen, J. Collins, B. Di Bartolo, B. Bowlby, B. Dinerman, D. Weyburne 168

UV-spectroscopy and band structure of Ti:$YAlO_3$
T. Danger, K. Petermann, N. Schwentner, G. Sliwinski, W.C. Wong 171

Luminescence properties of Nd_2BaZnO_5
B. Dareys, P. Thurian, S. Taboada, A. De Andres, M. Dietrich, R. Saez-Puche, A.P. Litvinchuk, J.L. Martinez, C. Thomsen 174

MgO-codoping-induced change in the site distribution and valence state of chromium ions in $LiNbO_3$
J. Díaz-Caro, J. García-Solé, H. Murrieta, F. Jaque 177

Excited state absorption of erbium-doped laser crystals
J.-L. Doualan, P. Le Boulanger, S. Girard, J. Margerie, F.-S. Ermeneux, R. Moncorgé 179

Vibronic transitions of TM^{3+} in various lattices: A comparison with Pr^{3+}, Eu^{3+} and Gd^{3+}
A. Ellens, S. Schenker, A. Meijerink, G. Blasse 183

MnO_4^{3-} NIR luminescence in Ba_2SiO_4
L.C. Ferracin, M.R. Davolos, L.A.O. Nunes 185

Two-photon spectroscopy of Eu^{2+} in cubic perovskite $KMgF_3$
R. Francini, U.M. Grassano, S. Boiko, G.G. Tarasov, A. Scacco 188

Size dependent efficiency in Tb doped Y_2O_3 nanocrystalline phosphor
E.T. Goldburt, B. Kulkarni, R.N. Bhargava, J. Taylor, M. Libera 190

Crystal field distribution and non-radiative transitions in Cr^{3+}-doped gallogermanates
M. Grinberg, W. Jaskolski, P.I. Macfarlane, B. Henderson, K. Holliday 193

Host dependence of the optical properties of the Nd^{3+} ions in zircon-type crystal YMO_4 (M = V, P, As)
O. Guillot-Noël, B. Viana, G. Aka, A. Kahn-Harari, D. Gourier, D. Vivien 195

Green up-conversion emission in Er^{3+}-doped $LiNbO_3$ ion-implanted planar waveguides
B. Herreros, G. Lifante, F. Cussó, P.D. Townsend, P.J. Chandler 198

Luminescence of a novel rare earth oxycompound, $La_2O_2CN_2:Eu^{3+}$
E. Säilynoja, M. Lastusaari, J. Hölsä, P. Porcher 201

Host anion effect on the energy level scheme of Sm^{3+} in SmOX (X = F, Cl and Br)
J. Hölsä, J. Korventausta, R.-J. Lamminmäki, E. Säilynoja, P. Porcher 204

Spectroscopy and excited-state absorption of $Ti^{4+}:Li_4Ge_5O_{12}$ and $Ti^{4+}:Y_2SiO_5$
W.C. Wong, T. Danger, G. Huber, K. Petermann 208

The luminescence of rare-earth tantalate single crystals
L.I. Kazakova, I.S. Bykov, A.B. Dubovsky 211

Photoluminescence of Eu^{3+} in KYF_4 and $KLuF_4$
N.M. Khaidukov, X. Zhang, J.-P. Jouart 213

Luminescence and guided-optics in Er-doped glass and GaAs films
H.K. Kim, C.C. Li, Y. Li, D.W. Langer, M. Migliuolo 215

Oscillator-strength calculations for Nd_2O_3 and $Nd^{3+}:LiYF_4$
M. Klintenberg, J.O. Thomas, S. Edvardsson 218

Photo bleaching in Sm^{2+} selectively doped epitaxial CaF_2 films
J.K. Krebs, C.L. Segal, W.M. Yen, U. Happek 220

Excited state absorption and its influence on the laser behavior of Cr^{4+}-doped garnets
S. Kück, K.L. Schepler, S. Hartung, K. Petermann, G. Huber 222

Spectroscopy of Dy^{3+}-doped $SrLaGa_3O_7$ crystals
M. Malinowski, I. Pracka, P. Myziak, R. Piramidowicz, W. Woliński 224

Thermal sensor based on luminescence of $Ru(bpy)_3^{2+}$ entrapped in sol–gel glasses
K. Maruszewski, D. Andrzejewski, W. Stręk 226

Reduction of degradation of $Y_3(Al, Ga)_5O_{12}$:Tb phosphors by Sc doping
H. Matsukiyo, H. Toyama, Y. Uehara, H. Yamamoto 229

Near-infrared luminescence of isolated and exchange-coupled Ni^{2+} ions in $Ni_cMg_{1-c}O$ solid solutions
N. Mironova, A. Kuzmin, J. Purans, V. Skvorcova 231

Luminescence quantum efficiency of europium aggregates in sodium chloride
J.A. Muñoz, E. Rodríguez, J.O. Tocho, F. Cussó 233

Traps in $SrAl_2O_4:Eu^{2+}$ phosphor with rare-earth ion doping
E. Nakazawa, T. Mochida 236

Defect dynamics measured with diamond anvil cell and site-selective laser spectroscopy
J.C. Wright, L.R. Olsen, A.O. Wright 238

Zirconium pyrophosphate activated with europium and terbium
V.A. Pelova, L.S. Grigorov 241

Eu^{3+}–O^{2-} associates luminescence in Ba_2SiO_4
A.M. Pires, M.R. Davolos, O.L. Malta 244

The influence of the host lattice on the luminescence of divalent europium
S.H.M. Poort, G. Blasse 247

Optical spectra and photoconductivity of uranium-doped CaF_2 crystals
M. Raukas, J. Choi, J.A. Campbell, W.M. Yen, U. Happek 250

Optical spectroscopy of Nd^{3+}-doped $KGd(WO_4)_2$ monocrystals
J. Ripoll, L.E. Bausá, C. Terrile, J. García Solé, F. Díaz 253

Optical properties of some rare earth and alkaline rare earth orthophosphates
U. Sasum, M. Kloss, A. Rohmann, L. Schwarz, D. Haberland 255

Investigations on the electronic structure of double phosphates of the type $M_3RE(PO_4)_2$ (RE = rare earths, lanthanides)
L. Schwarz, B. Finke, M. Kloss, A. Rohmann, U. Sasum, D. Haberland 257

Near-infrared laser crystals based on $3d^2$ ions: Spectroscopic studies of $3d^2$ ions in oxide, melilite and apatite crystals
M.A. Scott, T.P.J. Han, H.G. Gallagher, B. Henderson 260

Tb^{3+} molecular photonic device supported on silica gel and functionalized silica gel
O.A. Serra, E.J. Nassar, I.L.V. Rosa 263

Effect of temperature and pressure on radiative and nonradiative transitions of Sm^{2+} in SrFCl
Y.R. Shen, K.L. Bray, W.B. Holzapfel 266

Spectroscopic investigations of Ni^{2+} in $MgNb_2O_6$ and $ZnNb_2O_6$
R.J. Sherlock, T.J. Glynn, G. Walker, G.F. Imbusch, K.W. Godfrey 268

Full-color simulation in a multi-doped glass and controlled quenching of luminescence using Er (III) as a *suppressor* for a tunable device
J.E.C. Silva, O.L. Malta, G.F. de Sá, P.A. Santa-Cruz 270

Excitation and relaxation processes of Eu^{3+} crystals field transitions in Eu_2BaZnO_5
S. Taboada, J.E. Muñoz-Santiuste, A. de Andrés 273

Site-selective time-resolved laser spectroscopy of Eu^{3+} in $K_5Bi_{1-x}Eu_x(MoO_4)_4$ crystals
M. Voda, R. Balda, A.J. García, J. Fernández 276

Luminescence spectroscopy of Cr^{3+} and Mn^{2+} in spodumene ($LiAlSi_2O_6$)
G. Walker, A. El Jaer, R.J. Sherlock, T.J. Glynn, M. Czaja, Z. Mazurak 278

Optical properties of Cr^{2+} ions in $Cd_{0.85}Mn_{0.15}Te$
V.R. Davis, X. Wu, U. Hömmerich, K. Grasza, S.B. Trivedi, Z. Yu 281

Photoluminescence study of Er-doped AlN
X. Wu, U. Hömmerich, J.D. MacKenzie, C.R. Abernathy, S.J. Pearton, R.G. Wilson, R.N. Schwartz, J.M. Zavada 284

Mechanism of long phosphorescense of $SrAl_2O_4:Eu^{2+}$, Dy^{3+} and $CaAl_2O_4:Eu^{2+}$, Nd^{3+}
H. Yamamoto, T. Matsuzawa 287

Section 10. Microstructures and restricted geometries

Spectral hole burning of Eu^{2+} in MBE-grown superlattices of $CaF_2:Eu^{2+}/CdF_2$
D.M. Boye, Y. Sun, R.S. Meltzer, S.P. Feofilov, N.S. Sokolov, A. Khilko 290

Hot excitons in ZnSe quantum wells
M. Umlauff, J. Hoffmann, H. Kalt, W. Langbein, J.M. Hvam, H. Scholl, J. Söllner, M. Heuken, B. Jobst, D. Hommel 292

Application of persistent hole burning to site-selective spectroscopy of semiconductor quantum dots
Y. Masumoto, K. Sonobe, N. Sakakura 294

Nonlinear optical responses of exciton–microcavity coupled system in weak and intermediate coupling regime
R. Shimano, S. Inouye, I. Ogura, Y. Kadoya, M. Yamanishi, M. Kuwata-Gonokami 297

Excited state luminescense and fine structure in CdSe quantum dots
O. Wind, F. Gindele, U. Woggon 300

Diffusion of free trions in mixed-type GaAs/AlAs quantum wells
H.W. Yoon, M.D. Sturge, A. Ron, L.N. Pfeiffer 302

Quantum interference in exciton luminescence of coupled semiconductor quantum wells
V.I. Yudson, P. Reineker 305

Exciton spin dynamics in GaAs quantum wells
S. Adachi, T. Miyashita, S. Takeyama, Y. Takagi, A. Tackeuchi 307

Coherent spin transient of exciton in $CdTe/Cd_{0.6}Mn_{0.4}Te$ quantum wells
R. Akimoto, K. Ando, F. Sasaki, S. Kobayashi, T. Tani 309

LO phonon sideband photoluminescence in pure GaAs and GaAs/AlGaAs QWs
M. Kozhevnikov, B.M. Ashkinadze, E. Cohen, A. Ron 312

The relation between phototransport and photoluminescence in porous silicon
I. Balberg, Y. Lubianiker, J. Shinar, J. Partee, Y. Shapira, L. Burstein, S.Z. Weisz, M. Gomez 314

Non-linear carrier dynamics in a GaAs/AlAs heterostructure using time-correlated photoluminescence spectroscopy
P. Borri, S. Ceccherini, F. Bogani, M. Gurioli 316

Effect of one-dimensional structure on the Tb^{3+} $^5D_3 - {}^5D_4$ cross-relaxation in K_2YF_5
P. Boutinaud, R. Mahiou, J.C. Cousseins 318

Spectroscopy and characterisation of rate-earth doped PZG and ZBLA fluoride glass planar waveguides
M.C.M. de Lucas, C. Garapon, E. Lebrasseur, J. Mugnier, B. Jaquier, O. Perrot, B. Boulard, C. Jacoboni, E. Josse, J.L. Adam, G. Fonteneau, J. Lucas, J.E. Broquin, R. Rimet 321

Photoluminescence characterization of SiGe QW grown by MBE
P. De Padova, P. Perfetti, R. Felici, S. Priori, C. Quaresima, R. Pizzoferrato, M. Casalboni, P. Prosposito, F. Corni, R. Tonini, A. Grilli, A. Raco 324

Slow luminescence and hole burning of porous silicon
J. Dian, J. Valenta, J. Hála, I. Pelant 327

Two-photon excitation and luminescence of confined excitons in CuCl nanocrystals
K. Edamatsu, K. Hisakawa, T. Itoh 329

Investigation of growth conditions and codopants on the emission of $SrS:Ce^{3+}$ thin films
D.R. Evans, G.T. Warren, W.M. Dennis, S.-S. Sun, T. Nguyen 331

Evidence for photoluminescence band in p-type $Al_{0.67}Ga_{0.33}As$ related to nonequilibrium DX^- centres
P. Gladkov, K. Ždánský 333

Optical spectroscopy of hot carriers in low-dimensional systems
M. Godlewski, B. Monemar 336

Observation of folded phonons in the photoluminescense spectra of GaAs/GaAsP superlattices
O. Gorea, M. Karaman, A. Keyanu, O. Tatarinskaya 338

Stimulated emission of optically excited MOVPE grown ZnCdSe–ZnSe GRINSCH quantum well
D. Guennani, R. Tomasiunas, I. Pelant, M. Petrauskas, T. Cloitre, R. Aulombard, J.B. Grun, R. Levy 340

Two-dimensional confinement effect on Mn^{2+} intraionic transition
H. Ito, T. Takano, T. Kuroda, F. Minami, H. Akinaga 342

Luminescence mechanism of as-prepared and oxidized porous silicon
Y. Kanemitsu, H. Mimura, T. Matsumoto, T. Nakamura 344

Time-resolved photoluminescence in porous silicon
J. Kudrna, P. Bartošek, F. Trojánek, I. Pelant, P. Malý 347

Luminescence dynamics in GaAs/AlAs superlattices near the type-I/type-II crossover
W. Langbein, J.M. Hvam, H. Kalt 350

Influence of the corrugation on the optical properties of (1 1 3) oriented GaAs/AlAs superlattices
W. Langbein, D. Lüerßen, H. Kalt, J.M. Hvam, W. Braun, K. Ploog 353

Luminescence reabsorption in an inhomogeneously radiative medium: The case of (Al, Ga)Sb quantum wells around the Γ-L crossover
M. Leroux, J. Massies 355

Effect of optical phonons on the binding energy of an exciton in a quantum well
X.X. Liang, S.L. Ban, R.S. Zheng 358

Photoluminescence of random GaAs/(AlGa)As Superlattices
V. Capozzi, G.F. Lorusso, G. Perna, A. Bitz 361

Influence of the nanocrystalline surrounding on impurity optical spectral in mullite glass-ceramics and model system predictions
J. Männik, I. Sildos, O. Sild 364

Polarization modulation spectroscopy for measuring magnetooptical transitions with high Landau indices under low magnetic fields in narrow quantum wells
R. Maurer, E. Cohen, A. Ron, E. Linder, L.N. Pfeiffer, H. Shtrikman 366

Luminescence and ESR studies of photodarkening in CdS-doped glasses
T. Miyoshi, K. Towata, H. Matsuki, N. Matsuo 368

Quantum confinement of carriers and excitons due to the interface charges of copper halide nanocrystals in glass
A. Nakamura, M. Ohta, S. Sasaki, M. Takata 370

CL and EL properties of blue-emitting $SrGa_2S_4$:Ce thin films prepared by multi-source deposition
Y. Nakanishi, N. Uekura, F. Nakano, Y. Hatanaka 373

Effect of photodarkening on picosecond photoluminescence in CdSSe-doped glasses
P. Němec, F. Trojánek, S. Santhi, P. Malý 375

Quantum size effect in the excitonic luminescence of $CsPbX_3$-like quantum dots in CsX (X = Cl, Br) single crystal host
M. Nikl, K. Nitsch, K. Polák, E. Mihóková, S. Zazubovich, G.P. Pazzi, P. Fabeni, L. Salvini, R. Aceves, M. Barbosa-Flores, R. Perez Salas, M. Gurioli, A. Scacco 377

Visible photoluminescence from silicon single quantum wells
S. Okamoto, Y. Kanemitsu 380

Reconsideration of relaxation processes of excitons in CuCl nanocrystals
T. Okuno, A. Satake, Y. Masumoto 383

Photoluminescence in GaAs/AlGaAs microcavities
M. Opher-Lipson, E. Cohen, T.A. Fisher, M.S. Skolnick, E. Linder, J.S. Roberts 386

Photoluminescence under quasistationary excitation conditions in quantum wells and quantum-well wires
S.T. Pérez-Merchancano, M. De Dios-Leyva, L.E. Oliveira 389

Photonic band gap effect in a solid state cluster lattice
V.N. Bogomolov, A.V. Prokofiev, S.M. Samoilovich, E.P. Petrov, A.M. Kapitonov, S.V. Gaponenko 391

Binding energy of two-dimensional biexcitons in type-II superlattices
J. Singh, D. Birkedal, V.G. Lysenko, J.M. Hvam 393

Coexistence of dot and wire-like structures of CdS embedded in a polymer
V. Sperling, U. Woggon, A. Lohde, T. Haalboom 395

Dynamics of the two-dimensional exciton in a quantum well in the presence of an electric field
A. Thilagam, J. Singh 398

Photoluminescence and EPR studies of porous silicon
T.V. Torchinskaya, N.P. Baran, N.E. Korsunskaya, B.R. Dzhumaev, L.Yu. Khomenkova, M.K. Sheinkmann 400

Photoluminescence study of shallow acceptors in GaAs spherical quantum dots
J. Silva-Valencia, H. Paredes-Gutierrez, N. Porras-Montenegro 403

Spectral hole-burning and hole-filling in CuBr nanocrystals
J. Valenta, A.I. Ekimov, P. Gilliot, B. Hönerlage, R. Levy 406

Negatively charged exciton X^- in quantum wells with strong magnetic field
Xu Wang, R. Zheng 408

The photoluminescence of porous silicon under high hydrostatic pressure: A key experiment to determine the photoluminescence origin
J. Zeman, M. Zigone, G.L.J.A. Rikken, G. Martinez, M. Handfland, D. Häusermann 411

Section 11. Disordered and amorphous materials

Non-logarithmic spectral diffusion dynamics: Evidence for interactions between tunneling centers
H. Maier, D. Haarer 413

High pressure narrowing of zero-phonon lines in polymer glasses at different temperatures
V. Hizhnyakov, J. Kikas, A. Kuznetsov, A. Laisaar, V. Palm, P. Reineker 415

Luminescence and surface effects of closed-shell transition metal ions in sol–gel silica glasses
M. Herren, K. Yamanaka, N. Miyazaki, M. Morita 417

Spectroscopy of potential mid-infrared laser transitions in gallium lanthanum sulphide glass
T. Schweizer, D.W. Hewak, B.N. Samson, D.N. Payne 419

Effects of disorder on anharmonic phonon relaxation
S.K. Bose, S. Kirkpatrick, W.M. Dennis 422

Homogeneous line widths in glasses in the framework of a soft potential model
A.J. García, R. Balda, J. Fernández-Rodriguez 425

Structural relaxations in amorphous water
T. Giering, D. Haarer 427

Infrared-optical properties of undoped and gallium doped ZnO:Ga
M. Göppert, F. Gehbauer, M. Hetterich, J. Münzel, D. Queck, J. Klingshirn 430

Investigation of local structure of glass-forming liquids by fluorescense of doped dye molecules
Y. Ichino, N. Hashimoto, Y. Kanematsu, T. Kushida 432

Information on amorphous area and recrystallization process of poly(ethylene terephthalate) solids revealed by means of fluorescense measurements
H. Itagaki 435

Site selective study in Eu^{3+}-doped fluorozirconate glasses and glass-ceramics
V. Lavín, V.D. Rodríguez, I.R. Martín, U.R. Rodríguez-Mendoza 437

Calculations of the optical line shapes for disordered molecular aggregates using the resolvent of the Hamiltonian
D.V. Makhov, V.V. Egorov, A.A. Bagatur'ants, M.V. Alfimov 439

Defect population in silica glasses studied by luminescence VUV excitation spectroscopy
B. Poumellec, T. Taunay, P. Bernage, R. Cortes, J.C. Krupa 442

Site distribution in Cr^{3+} and Cr^{3+}–Tm^{3+}-doped alkaline silicate glasses

Population grating in Ca, Cr:YAG
J. Romero, H. Liu, Y. Wang, W. Jia 854

Section 20. Excitons and collective phenomena

Interplay between exciton properties and interface quality in CdTe/CdMnTe quantum well structures grown by molecular-beam epitaxy
M. Godlewski, M. Surma, T. Wojtowicz, G. Karczewski, J. Kossut, J.P. Bergman, B. Monemar 857

Localized states in two-dimensional Frenkel exciton: Resonant Rayleigh scattering and numerical study
H. Ishikawa, T. Tanaka, A. Tomioka, K. Miyano 860

Observation of luminescence hole-burning in CuCl quantum dots
T. Kawazoe, Y. Masumoto 862

Influence of the electric field on the excitonic luminescence of epitaxial GaN films
D.K. Nelson, V.D. Kagan, E.V. Kalinina, M.A. Jacobson 865

New method of photonic band calculation and its application
Y. Ohfuti, H. Fukutome, K. Cho 867

Circularly polarized exciton emission and fine structure of the luminescence band in $Zn_{1-x}Cd_xSe/ZnSe$ MQWs
A. Reznitsky, A. Kornievsky, S. Permogorov, L. Tenishev, S. Verbin, A.Yu. Kaminski, S. Ivanov, S. Sorokin 869

Tunnel luminescence: Failure of the Born–Oppenheimer and Franck–Condon aproximations and collective phenomena
V.V. Egorov 871

Excitonic state in anatase TiO_2 single crystal
N. Hosaka, T. Sekiya, S. Kurita 874

Coherent and incoherent transport properties of excitons at high density in a quasi two-dimensional space of a stacking disorder interface in a layered crystal BiI_3
T. Karasawa, T. Kawai, H. Mino, I. Akai, T. Komatsu 876

Excitation wavelength-dependent intraband relaxation mechanisms of Frenkel excitons in PIC J aggregates
S. Kobayashi, F. Sasaki 879

Fluorescence of ionic alkali rare gas excimers in matrices
S. Moeller, P. Gürtler 881

Self-trapped exciton and recombination luminescence in $PbCl_2$, $PbBr_2$ and their mixed crystals
M. Kitaura, H. Nakagawa 883

Second emission of bound excitons with large and small radii in lithium hydride single crystals
V.A. Pustovarov, T.A. Betenekova, N.V. Suvorov, S.O. Cholakh 885

Configuration of the self-trapped exciton in the alkali halides
D.Y. Smith, M.S. Malghani 887

Self-trapped exciton in Li_2GeO_3
A.N. Trukhin, U. Rogulis, M. Spingis 890

Biexciton luminescence in alkali iodides
T. Tsujibayashi, K. Toyoda, T. Hayashi 893

Dynamical aspects of the self-trapped excitons in CsI under hydrostatic pressure
T. Tsujimoto, H. Nishimura, M. Nakayama 895

Novel exciton-like optical transitions in AlGaAs/GaAs single heterojunctions
M. Zvára, M. Cukr, R. Grill, P. Hlídek, V. Koubele, J. Oswald, J. Soubusta 898

Section 21. Energy transfer and dynamics

Theoretical evaluation of cooperative luminescence rate in Yb^{3+}: $CsCdBr_3$ and comparison with experiment
P. Goldner, F. Pellé, F. Auzel 901

Energy transfer from Gd^{3+} to Cr^{3+} in $Cr^{3+}:Gd_3Sc_2Ga_3O_{12}$ (GSGG)
S.K. Vargas, D.S. Hamilton 904

Anion- and cation-type energy transfer in $BaF_2:Dy$
J. Becker, G. Zimmerer, C. Shi 906

Excimer formation in pyrene crystals
H. Däubler, P. Reineker, V.I. Yudson 909

Penetration depths of photomobilized F atoms from a sandwich experiment
M. Dickgiesser, C. Bressler, N. Schwentner 912

Electronic energy transfer in restricted geometries. Application to the study of spherical and planar interphases of diblock copolymer films
J.P.S. Farinha, J.M.G. Martinho 914

Spectral properties of systems with semi-Markov fluctuations
O. Frege, P. Chvosta, E. Paule, P. Reineker 918

Photochromism of N-salicylideneaniline single crystal
T. Goto, I. Tashiro 921

Energy transfer and relaxation of excitons and percolation-type clusters of PbI^2 dispersed in CdI_2 crystal
P. Gu, M. Watanabe, Y. Hayashi 923

Direct observation of optically controlled energy transfer in Tb^{3+}-doped glasses
T. Hayakawa, N. Kamata, Y. Koike, K. Yamada 925

Up-conversion spectroscopy of $Nd^{3+}:KLiYF_5$
K. Holliday, D.L. Russell, B. Henderson 927

Decay of core holes in cesium chloride studied by the luminescence spectroscopy
I.A. Kamenskikh, V.V. Mikhailin, I.H. Munro, D.A. Shaw, I.N. Shpinkov, A.N. Vasil'ev 930

Temporal behavior of resonant secondary emission in $NaNO_2$: temperature dependence
A. Kato, M. Ashida, R. Kato 933

Energy-dispersive excitation transport in polyphenylene-vinylene probed by femtosecond luminescence-up-conversion
R. Kersting, B. Mollay, M. Rusch, J. Wenisch, C. Warmuth, H.F. Kauffmann 936

Excitation of Tl^+ centers by hot photoelectrons in alkali halide crystals
M. Kirm, E. Feldbach, A. Lushchik, Ch. Lushchik, I. Martinson 939

Study of energy transfer from Yb^{3+} to Er^{3+} in rare-earth silicates and borates
V.A. Lebedev, V.F. Pisarenko, Yu.M. Chuev, A.A. Perfilin, A.G. Avanesov, V.V. Zhorin, A.G. Okhrimchuk, A.V. Shestakov 942

Formation of small polaron and excitation transfer in niobate crystals
H. Liu, Y. Wang, W. Jia 945

The effects of sensitisation on the activator emission in laser crystals
H. Liu, Y. Wang, W. Jia 945

The effects of sensitisation on the activator emission in laser crystals
V. Lupei, A. Lupei, G. Boulon 948

Energy transfer between Cr^{3+} and Nd^{3+} in Cr, Nd:YAP
E. Luria, S.R. Rotman, J.A. Mares, G. Boulon, A. Brenier, L. Lou 951

Kinetics of transfer and backtransfer in Yb^{3+}–Er^{3+} codoped fluoroindate glasses
I.R. Martín, V.D. Rodríguez, V. Lavín, U.R. Rodríguez-Mendoza 954

The parity conservation model for the energy cross relaxations among Tb^{3+} ions in glasses
F. Maruyama, K. Yamada 956

Energy transfer and migration processes in Yb^{3+}-ion-sensitized, rare-earth-ion-activated luminescent materials
Y. Mita, T. Ide, T. Katase, H. Yamamoto 959

Energy relaxation dynamics in the optical excited state of rhodamine in polyvinyl alcohol
H. Murakami, T. Kushida 961

Density matrix theory of photodissociation
F. Neugebauer, V. May 963

Incoherent electronic excitation transport and dynamically disordered substitutional traps
T. Pálszegi, H.F. Kauffmann 966

Luminescence and energy transfer in Tm doped crystals
I.K. Razumova, A.M. Tkachuk, D.I. Mironov, A.A. Nikitichev 969

Optimization by energy transfer of the 2.7 μm emission in the Er:$SrLaGa_3O_7$ melilite crystal
B. Simondi-Teisseire, B. Viana, A.M. Lejus, D. Vivien 971

The discrete energy transfer theory for donor fluorescence of RE^{3+} ions in glasses
K. Tonooka, K. Yamada, T. Hayakawa 974

Energy transfer and laser spectroscopy of Eu^{3+} co-doped CaF_2:Sm^{3+}
J.-P.R. Wells, G.D. Jones, R.J. Reeves 977

Photoluminescence quantum efficiency and dynamics in $ZnSe_{1-x}Te_x$ and $CdS_{1-x}Se_x$ mixed crystals
R. Westphäling, T. Breitkopf, S. Bauer, C. Klingshirn 980

Red excited-state absorption and upconversion in Er^{3+}:$Ca_3Al_2Ge_3O_{12}$
X. Zhang, J.-P. Jouart, G. Mary, X. Liu, J. Yuan 983

Section 22. Electroluminescence

Starburst molecules based on π-electron systems as materials for organic electroluminescent devices
Y. Shirota, Y. Kuwabara, D. Okuda, R. Okuda, H. Ogawa, H. Inada, T. Wakimoto, H. Nakada, Y. Yonemoto, S. Kawami, K. Imai 985

Short-term degradation of porous silicon light-emitting diodes
P. Knapek, K. Luterová, J. Kočka, A. Fejfar, I. Pelant, J. Linnros, N. Lalic 992

STM excited electroluminescence of GaN microcrystals
A. Liebheit, M. Schwartzkopf, P. Radojkovic, E. Hartmann, E. Hechtl, V. Petrova–Koch, F. Koch 994

$ZnGa_2O_4$ as host material for multicolor-emitting phosphor layer of electroluminescent devices
T. Minami, Y. Kuroi, T. Miyata, H. Yamada, S. Takata 997

Electroluminescent spectra for Tb^{3+} doped $Zn_{1-x}Cd_xS$ thin-films
N. Miura, T. Namiki, H. Matsumoto, R. Nakano 999

Microcavity effects in thin-films electroluminescence
G.O. Mueller, R. Mueller-Mach, E. Alinsog, H. Lee, D. Harrison 1002

Behavior of charge carriers and excitons in poly(methylphenylsilane) as investigated by electroluminescence from single-layer-light-emitting diodes
H. Suzuki 1005

Guided modes in spontaneous edge electroluminescence from GaInAsP/InP heterostructure diodes
J. Zavadil, K. Starosta 1007

Electroluminescence and deep-level transient spectroscopies of minority carrier traps in GaP:N structures with p–n junctions
K. Ždánský, J. Zavadil, D. Nohavica, P. Heidborn 1010

Section 23. Fluorescence microscopy

Stochastic theory of the optically detected single-spin coherent phenomena: Application to the pentacene molecule in *p*-terphenyl crystal
S.Ya. Kilin, A.P. Nizovtsev, P.R. Berman, J. Wrachtrup, C. von Borczyskowski 1013

On the theory of single molecule spectroscopy in condensed matter
E. Paule, P. Chvosta, P. Reineker 1015

Section 24. Novel techniques

A distributed optical fibre fluorosensor for pH measurement
P.A. Wallace, M. Campbell, Y. Yang, A.S. Holmes-Smith, M. Uttamlal 1017

Transient event-locked Fourier spectroscopy
H. Weidner, R.E. Peale 1020

Section 25. Others

Luminescence of $LiF:F_2^+$ crystal excited with evanescent field and its application to fiber-optic amplification
T. Tsuboi, V.V. Ter-Mikirtychev, V.A. Kozlov 1022
